

## Steve Jensen – W6RHM (bio)

Steve Jensen was first licensed as WN6RHM on July 14, 1952. Technology has changed a bit since then.

Steve Jensen, July 1952

Steve Currently holds extra class license W6RHM.

Ham radio led Steve to pursue a career in electronic engineering and later to specialize as a consultant in Electromagnetic Compatibility (EMC).

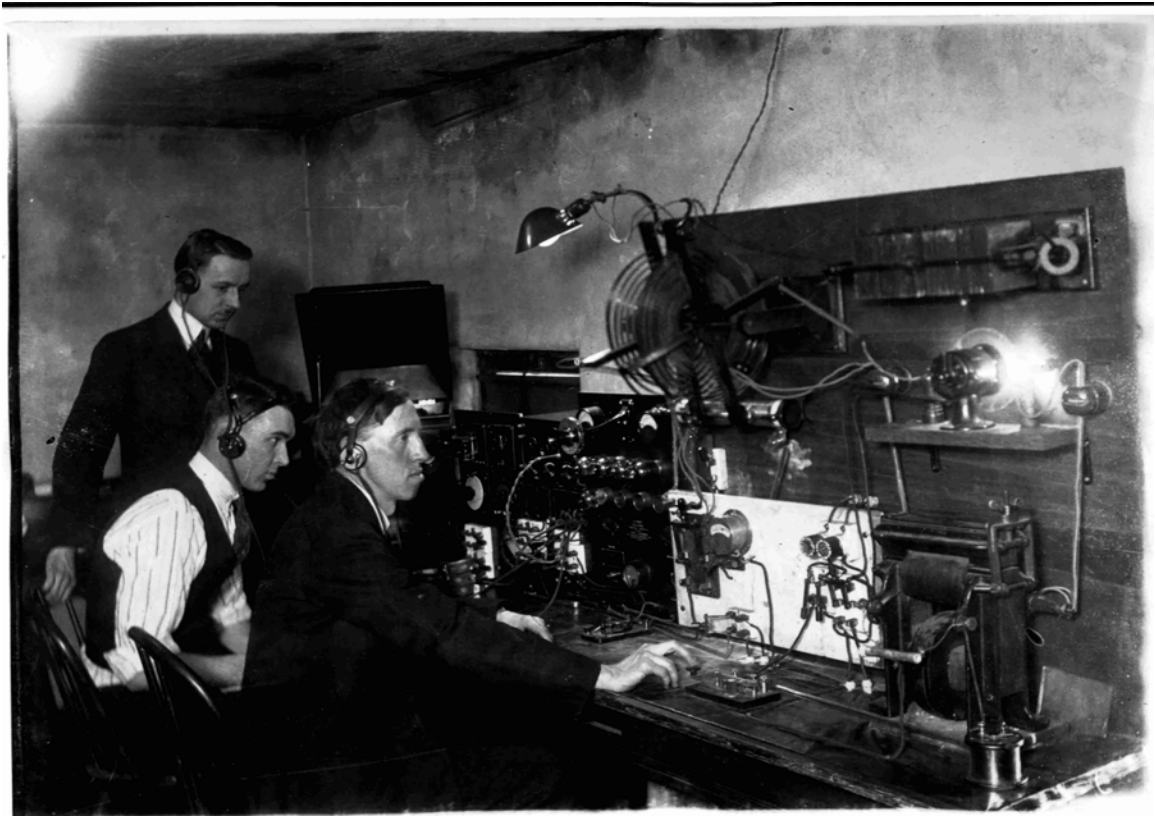

Steve is the president and principal consultant of Steve Jensen Consultants Inc. with offices in Redlands, California. Most of his business is related to commercial and military aerospace EMC requirements.

Steve has a BSE from UCLA College of Engineering (1963) and is a graduate of the UCLA Executive program (Group 43) in 1976.

Steve's interest in amateur radio stems from a long family lineage starting with his Grandfather (9YD) shown below operating from his station at Nebraska Wesleyan University in 1918.

Steve's dad was Bob Jensen – W6VGQ (SK) and Steve's step mom was Lenore Jensen W6NAZ (SK). Steve's sister is KA7ITT, Cindy Wall who is the author of a series of amateur radio adventure stories.

Steve's paper, [EMC for the Ham Shack](#) is motivated from bitter experience and lessons learned related to the importance of controlling common mode RF from the shack. It seemed only prudent to share what has been learned with others in similar situations.

John C. Jensen 9YD – 1918
